

Quality Assurance Policy

This policy ensures ZKJ Energy Partners Limited consistently meets customer expectations, complies with regulations, and adheres to industry best practices in all projects and services within the oil, gas, and power sectors.

ZKJ Energy Partners Limited is committed to providing high-quality services through a robust Quality Assurance (QA) system that ensures compliance with applicable standards and continuous improvement in all operations.

To sustain Quality Assurance, we are committed to:

- Maintaining a QA system that ensures all services and products meet the required standards and specifications.
- Providing resources to support the QA system's implementation and continuous development.
- Complying with all relevant local, regional, and international quality standards and regulations.
- Regular reviews will ensure adherence to updated industry standards.
- Ongoing quality improvements, setting measurable goals, and refining processes based on audits and feedback.
- Employee suggestions for improvements will be encouraged and considered.
- All personnel receiving the necessary training to implement QA practices effectively and remaining up-to-date with industry standards.
- Ensuring that all suppliers and subcontractors adhere to our quality requirements and deliver products and services that meet our standards.
- Continuously align our services with customer needs and seek feedback for improvement.

Senior management is responsible for the QA system, setting objectives, and ensuring resources are allocated to meet quality goals.

This policy will be periodically reviewed to ensure its effectiveness and alignment with company objectives.
